

## RUST-RESISTANT BODY

Rust-resistant performance is increased by using anti-corrosion sheet steel and anti-corrosion treatment by applying wax, sealer, anti-chipping paint, etc. to easily corroded parts such as the hood, doors, rocker panels, etc.

### ■ ANTI-CORROSION SHEET STEEL

2 types of anti-corrosion sheet steel are used: galvanized sheet steel and zinc-iron alloy double layer galvanized sheet steel. Galvanized sheet steel is used for many inner panels and the engine compartment, etc. Zinc-iron alloy double layer galvanized sheet steel is used for major outer panels such as the hood, doors and back door.
