DISC WHEELS

- Aluminum disc wheels for use with wide tires are newly provided. The center ornament is made of plastic for weight reduction.
- The 16 x 6.5JJ disc wheel has been changed from the type with a side ring to a one-piece rim type for improved NV performance.

Aluminum Disc Wheel

OUTSIDE MOLDINGS

- Two types of outside moldings are available, wide and narrow.
- The surface of the painted, wide-type outside moldings is made grainless to improve their looks, and uses TSOP (The Super Olefin Polymer) as the plastic material to improve their recyclability.

Wide Type
